The students of III Year Artificial Intelligence and Data Science (AI&DS), Darshana P, Jose Priyadharshini M, and Rajeshwari R, brought pride to the institution by securing the Third Prize in the National Level Hackathon “Hack Warriors ’26” organized by IFET College of

Engineering, Villupuram on 23rd January 2026. Competing with participants from various institutions, the team demonstrated exceptional technical knowledge, innovative thinking, and problem-solving abilities throughout the event. Their remarkable performance earned them a cash award of Rs.10,000/- and appreciation from the organizers and judges.

The achievement highlights the students’ dedication, teamwork, and passion for emerging technologies and innovation. Their success in the hackathon reflects the department’s continuous

efforts in encouraging practical learning, creativity, and industry-oriented skills among students. Such accomplishments inspire fellow students to actively participate in technical competitions and strengthen their confidence in developing real-world solutions through technology.

Dr. S. Palani Murugan, Associate Professor, Department of Artificial Intelligence and Data Science (AI&DS), achieved a significant academic milestone by publishing a research paper titled “Intelligent Decision-Making Systems for Early Detection of Alzheimer’s Disease using Wearable Technologies and Deep Learning” in the reputed journal Scientific Reports on 22 January 2026. The research highlights the application of wearable technologies and deep learning techniques in developing intelligent healthcare systems for the early detection of Alzheimer’s disease. This achievement reflects the faculty member’s dedication to innovative research and contribution towards advancing healthcare technologies through Artificial Intelligence.

Mrs. S. Akilandeswari, Assistant Professor, Department of Artificial Intelligence and Data Science, achieved a significant research milestone by publishing a paper titled “Enhancing Security in Underwater Wireless Sensor Networks using a Hybrid Approach of Beetle Antenna Search and Genetic Algorithms” in the International Journal of Computer Networks and Applications in December 2025. The study focuses on strengthening the security and performance of underwater wireless sensor networks through the integration of advanced hybrid optimization techniques and genetic algorithms.

This accomplishment reflects the department’s dedication to innovative research and its commitment to addressing emerging challenges in communication networks and cybersecurity..

The Department of Artificial Intelligence and Data Science at EGS Pillay Engineering College organized an Industry Interaction session titled “The Gen AI Revolution – From Chatbots to Agents & Vibe Coding” on 28 January 2026 in online mode. Coordinated by Mr. V. Manikandaprabhu, Assistant Professor, and Dr. M. Priya, Professor, the session featured Mr. Boobathi Ayyasamy, Senior Programmer at Tata Consultancy Services, as the resource person. The programme provided participants with a comprehensive overview of the rapid advancements in Generative AI and its growing impact across industries.

During the session, students gained valuable insights into the evolution of chatbots, the emergence of AI agents, and the concept of vibe coding in modern software development. The expert talk highlighted real-world applications, industry practices, and future opportunities in the field of Artificial Intelligence. The interaction enriched students’ understanding of current technological trends and strengthened their readiness to adapt to the evolving demands of the AI-driven industry.

The Department of Artificial Intelligence and Data Science organized a Two-Day Workshop on "Web Development Technologies" on 29th and 30th January 2026, from 09:15 AM to 04:00 PM at SJB 203, exclusively for II-Year AI&DS students. The workshop was led by the distinguished resource person Mr. J. S. Raghavan, Coordinator – Branding and Social Media, E.G.S. Pillay Group of Institutions, whose industry experience brought a refreshing and practical perspective to the sessions. The workshop comprehensively covered foundational and advanced concepts including HTML, CSS, JavaScript, and Responsive

Web Design, equipping students with the essential building blocks of modern web development. Beyond technical skills, the workshop also shed light on the latest trends in web technologies, along with valuable insights into certification courses and career pathways available in the web development domain. This gave students a broader understanding of how to translate their learning into professional opportunities.

The workshop culminated in an engaging and interactive discussion between students and the resource person, fostering a spirit of curiosity and dialogue. The event was meticulously coordinated by Ms. R. Divyabharathi, AP/AI&DS, ensuring a seamless and enriching learning experience for all participants.

The Department of Artificial Intelligence and Data Science successfully organized the “Google Cloud Technical Series” on 28th and 29th January 2026 for II and III Year AI&DS students. The programme provided valuable insights into cloud computing concepts, Google Cloud services, deployment techniques, and industry-oriented applications. Through interactive sessions, students gained practical exposure to cloud infrastructure, storage solutions, deployment models, and real-world cloud technologies.

The event also highlighted certification pathways and career opportunities in cloud computing, enhancing students' technical knowledge and industry readiness.

The NEXORA Club of the Department of Artificial Intelligence and Data Science organized an online webinar on “Next-Gen Full Stack Development with AI Learning Algorithm” on 24th January 2026. The session, led by Mr. Seeni Ameenulla, Founder and CEO of S-Tech Solutions, Ramanathapuram, provided valuable insights into the integration of Artificial Intelligence with modern full stack development technologies. Participants gained knowledge on AI-powered web application development, intelligent software design, and emerging industry trends. The webinar enhanced students’ understanding of next-generation technologies, career opportunities in AI-driven development, and the evolving landscape of software Engineering through an engaging and interactive learning experience.

Students of III Year Artificial Intelligence and Data Science, Darshana P, Jose Priyadharshini M, and Jaya Dhurga K, participated in “HackFest 2K26,” a 36-hour hackathon organized by M. Kumarasamy College of Engineering, Karur, from 20th to 22nd February 2026. The event provided an excellent platform for students to apply their technical knowledge, collaborate as a team, and develop innovative solutions to real-world challenges.

Their active participation and successful completion of the hackathon earned them certificates of participation while enhancing their problem-solving, creativity, and application development skills.

Muthu Meena Monisha M.S and Dhanusri S of II Year Artificial Intelligence and Data Science brought laurels to the institution by securing the 3rd Prize in the event “BrainiX” at a Technical Event organized by Annai College of Engineering and Technology on 18th February 2026.

Their outstanding performance showcased strong technical expertise, analytical skills, and innovative thinking. This achievement reflects the students’ dedication to academic excellence and their ability to compete successfully in intercollegiate technical competitions.

The III Year Artificial Intelligence and Data Science students Darshana P, Jose Priyadharshini M, Rajeshwari R, and Shahana K successfully completed a one-month Web Developer Internship at One Yes Infotech Solution Private Limited from 23rd February to 23rd March 2026. The internship provided valuable industry exposure in web application development, frontend and backend technologies, responsive web design, and software development practices. Through hands-on experience in real-time projects, the students enhanced their technical competencies, problem-solving abilities, and professional skills, strengthening their readiness for future careers in the IT industry.

Mohammed Khalifa A and Rajavarman E, IV Year students of the Department of Artificial Intelligence and Data Science, are currently undergoing an AI & ML Internship at Synvolve Intellis, Coimbatore, from 4th February 2026. The internship provides industry-oriented training in Artificial Intelligence and Machine Learning, enabling students to gain practical exposure to emerging technologies and real-world applications. The programme focuses on machine learning model development, data analysis, and AI-based solution implementation. Through this hands-on learning experience, the students are enhancing their technical expertise, professional skills, and industry readiness, paving the way for successful careers in the rapidly growing fields of Artificial Intelligence and Machine Learning.

The Department of Artificial Intelligence and Data Science organized a Hands-on Session on “Career Path as an ML Developer” for III Year AI&DS students on 4th February 2026. Coordinated by Mr. R. Gobinath, AP/AI&DS, the session provided valuable insights into career opportunities in Machine Learning, essential technical competencies, industry expectations, and real-world project development practices. Through interactive demonstrations and practical activities, students gained hands-on experience in machine learning workflows, model development, and deployment strategies.

The programme also offered guidance on certifications, internships, and placement opportunities, helping students prepare for successful careers in the rapidly growing field of Machine Learning.

The Department of Artificial Intelligence and Data Science of EGS Pillay Engineering College organized an online webinar on “Transforming DevOps with Generative AI” on 28th February 2026. The programme was coordinated by Dr. M. Priya, Professor/AI&DS, and Mrs. P. Vanitha, AP/AI&DS. The session was delivered by Mrs. B. Chitra, Technical Manager, BNP Paribas, Singapore, who shared her expertise on the growing impact of Generative AI in modern software development and DevOps environments.

The webinar provided valuable insights into AI-powered automation, software deployment, cloud-native development practices, and the integration of Generative AI into DevOps workflows.

Participants gained a deeper understanding of emerging technologies, industry trends, and innovative solutions that are reshaping the software development lifecycle. The session served as an excellent platform for students to enhance their technical knowledge and prepare for future opportunities in AI-driven software engineering and cloud technologies.

The Department of Artificial Intelligence and Data Science organized an online seminar on “Future Ready: Preparing for the Next-Gen AI & Data Science Career” on 7th February 2026 for II and III Year AI&DS students. Coordinated by Ms. R. Divyabharathi, AP/AI&DS, the seminar focused on emerging trends in Artificial Intelligence and Data Science, industry expectations, career readiness, and skill development strategies. Students gained valuable insights into advanced tools, technologies, certification opportunities, and diverse career pathways in the rapidly evolving AI sector. The interactive session enabled participants to clarify career-related queries and better prepare for future opportunities in the field of AI and Data Science.

The Department of Artificial Intelligence and Data Science, in association with EDZEN – The Edge AI Club, organized an online session on “Edge AI Essentials: The Future of AI at the Edge” on 1st February 2026. The programme featured Mr. Sawant Kumar, AI Software Simulation Engineer at Intel Corporation, who shared valuable insights into the fundamentals of Edge AI, real-time applications, offline AI systems, and practical deployment strategies. The session enabled students to explore emerging Edge AI technologies and innovative solutions, enhancing their understanding of how artificial intelligence can be implemented in real-world environments.

The event successfully bridged the gap between theoretical learning and industry-oriented applications, inspiring students to pursue advancements in the rapidly evolving field of Edge AI.

The Department of Artificial Intelligence and Data Science, in association with EDZEN – The Edge AI Club, organized the online event “Edge Under Constraints: Edge AI Ideathon Competition” on 21st February 2026. The competition challenged students to develop innovative Edge AI solutions capable of operating in resource-constrained environments with limited power and computational capacity. Participants showcased creative ideas addressing real-world challenges through Edge AI concepts, demonstrating strong problem-solving, teamwork, and presentation skills.

The event provided valuable exposure to practical AI deployment scenarios and fostered innovation, critical thinking, and the application of emerging technologies to solve contemporary problems.

The NEXORA Club of the Department of Artificial Intelligence and Data Science organized an online session titled “Orientation on Gen AI Tools Exploration” on 8th February 2026. The programme was conducted by Mr. G. Gokulram, II Year AI&DS student of E.G.S. Pillay Engineering College, who introduced participants to various Generative AI tools and their growing significance across academic, professional, and industrial domains.

The session provided an overview of emerging AI technologies and their transformative impact on learning and productivity.

Through live demonstrations and interactive discussions, students gained practical exposure to AI-powered tools for content creation, coding assistance, research support, problem-solving, and productivity enhancement. The orientation emphasized the responsible and effective use of Generative AI technologies while encouraging students to explore innovative applications in their academic projects and future careers. The event successfully enhanced awareness of next-generation AI tools and inspired participants to integrate them into their learning journey.

The Department of Artificial Intelligence and Data Science proudly celebrates the placement achievements of its students for the academic year 2025–2026. Through consistent hard work, technical proficiency, and focused skill development, students secured placements in reputed organizations across diverse domains. Abinaya K was placed in Decathlon, Rubika M in digital.ai with a package of 3 LPA, Subitcha S as a Data Analyst at IZeon Innovative, and Pavalambiga S in TCS – Tata Consultancy Services with a package of 3.46 LPA. These accomplishments reflect the department’s commitment to academic excellence, industry-oriented training, and career readiness. The department extends its heartfelt congratulations to the placed students and wishes them continued success in their professional journeys.

Darshana P and Shahana K, students of III Year Artificial Intelligence and Data Science, are currently undergoing an internship at Oil and Natural Gas Corporation (ONGC), Karaikal, from 30th March 2026. This opportunity provides them with valuable exposure to industrial operations, technical workflows, and real-time project environments within one of India’s leading public sector enterprises.

The internship serves as an important platform for students to understand the practical applications of engineering and technology in an industrial setting. Through hands-on learning and active participation in various technical activities, the students are gaining industry-relevant knowledge and professional experience. The internship is helping them strengthen their analytical, problem-solving, and technical skills while enhancing their understanding of workplace practices and project execution. Such industry exposure contributes significantly to their career development and prepares them for future professional challenges.

Mrs. S. Shajini, Assistant Professor, Department of Artificial Intelligence and Data Science, achieved a significant research milestone with the publication of her paper titled “Enhancing Object Detection Accuracy Using a Hybrid CNN–Transformer Architecture for Complex Visual Environments” in IEEE on 13th March 2026. The research focuses on improving object detection performance .

Through the integration of advanced CNN and Transformer-based deep learning architectures, enabling more accurate analysis in complex visual environments. This accomplishment reflects the department’s commitment to research excellence and innovation in the field of Artificial Intelligence and Computer Vision.

Mrs. S. Akilandeswari, Assistant Professor, Department of Artificial Intelligence and Data Science, has added a notable achievement to the department’s research portfolio through the publication of her research paper titled “Advanced Prediction and Classification of Pulmonary Emphysema in COPD using Deep Graph Convolutional Neural Network with Improved Weighted Quantum Ant Bee Optimization for CT-Based Diagnosis” in Springer Nature.

The research explores innovative deep learning and optimization techniques for the accurate prediction and classification of pulmonary emphysema using CT-based diagnostic data. This significant contribution highlights the potential of Artificial Intelligence in advancing healthcare solutions and reflects the department’s commitment to cutting-edge research and technological innovation.

The Department of Artificial Intelligence and Data Science organized a One-Day Workshop on “Predictive Analytics in Healthcare Using AI & ML” for II Year AI&DS students on 16th March 2026 at the Placement Lab. The programme was conducted under the guidance of Dr. J. Amutha, Head of AI&DS, and coordinated by Mrs. S. Shajini, Assistant Professor/AI&DS. The session was led by Mr. M. Muthu Karthikeyan, Managing Director, MI Software Solutions, Chennai, who shared his expertise on the growing role of Artificial Intelligence and Machine Learning in transforming the healthcare sector.

The workshop focused on healthcare analytics, predictive modeling, and data-driven decision-making using AI and ML technologies. Through practical examples and interactive learning activities, students gained valuable insights into real-world healthcare applications and industry practices. The programme enhanced participants’ technical knowledge and provided a deeper understanding of how emerging technologies can be leveraged to improve healthcare outcomes and support innovative medical solutions.

The Department of Artificial Intelligence and Data Science of EGS Pillay Engineering College organized a “Virtual Orientation on GATE Programme” on 15th March 2026 for II and III Year AI&DS students. The session was delivered by Dr. Garkki B, Post Doctoral Fellow, Department of Energy

Science and Engineering, Indian Institute of Technology Bombay, who provided valuable insights into GATE preparation strategies, higher education opportunities, research pathways, and career development prospects. The programme enhanced students’ awareness of competitive examinations and motivated them to pursue academic excellence, advanced studies, and research-oriented careers, thereby strengthening their preparedness for future professional and educational opportunities.

The Department of Artificial Intelligence and Data Science organized a webinar on “Multimodal AI” for II and III Year AI&DS students on 20th March 2026 through an online platform. The session was delivered by Mr. Pavan Purohit, AI Engineer, IBM, Bengaluru, who provided valuable insights into the integration of text, image, audio, and video

processing using advanced Artificial Intelligence techniques. Students gained exposure to the latest developments in Multimodal AI, real-world industry applications, and emerging career opportunities in the rapidly evolving AI landscape. Organized under the guidance of Dr. J. Amutha, Head of AI&DS, and coordinated by Mrs. S. Akilandeswari and Mrs. S. Shajini, Assistant Professors, AI&DS, the webinar enriched participants’ understanding of next-generation AI technologies and their transformative impact across industries.

The Department of Artificial Intelligence and Data Science organized a webinar on “Agentic AI & its Frameworks” for II and III Year AI&DS students on 24th March 2026 through an online platform. The session was delivered by Mr. Rakesh Panigrahy, AI/ML Computational Science Specialist, Accenture, Bengaluru, who provided valuable insights into Agentic AI, intelligent autonomous systems, and modern frameworks used for developing advanced AI applications. The webinar enabled students to explore real-world implementations of Artificial Intelligence, emerging industry practices, and the latest trends in AI and Machine Learning. Organized under the guidance of Dr. J. Amutha, Head of AI&DS, and coordinated by Mrs. S. Akilandeswari and Mrs. S. Shajini, Assistant Professors, AI&DS,

The programme enriched students’ understanding of next-generation AI technologies and their growing impact across industries.

The Department of Artificial Intelligence and Data Science conducted a three-day Partial Delivery of Course on “Data Mining and Data Visualization Techniques” for II Year AI&DS students from 25th to 27th March 2026 at SJB 203. The programme was led by Mr. M. A. Mohamed Danish, AI Research Associate, LPSC, Trivandrum, who shared his expertise on data mining methodologies, data analysis processes, and advanced visualization techniques. The sessions were designed to provide students with both theoretical knowledge and practical exposure to modern data analytics practices.

Through interactive discussions, demonstrations, and hands-on activities, students developed a deeper understanding of data-driven decision-making and the effective presentation of analytical insights. The programme introduced participants to contemporary data analytics tools and their real-world applications across various domains. Organized under the guidance of Dr. J. Amutha, Head of AI&DS, and coordinated by Ms. K. Rahapriya, Assistant Professor, AI&DS, the event significantly enhanced students’ analytical capabilities and industry-oriented technical skills.

The Department of Artificial Intelligence and Data Science, in association with EDZEN – The Edge AI Club, organized the online event “Code-Light Edge AI: Collaborative Project Showcase” on 14th March 2026. The programme provided students with practical exposure to Edge AI concepts through collaborative and code-light learning approaches.

Project presentations by Anmantha Raj and Darshana highlighted innovative real-world applications of Edge AI, enabling participants to enhance their technical knowledge, teamwork, and presentation skills. The session also introduced students to industry-relevant tools such as MediaPipe, MobileNetV2, and OpenCV for developing simple AI models and real-time intelligent applications. The event successfully fostered innovation, practical learning, and a deeper understanding of emerging Edge AI technologies.

The NEXORA Club, in association with Skylark Association, organized an online “Gen AI Weaver Workshop” on 21st March 2026. The session was conducted by Mr. M. Sathivel, II Year AI&DS student of

E.G.S. Pillay Engineering College, who introduced participants to the fundamentals of Generative AI and its growing role in innovation and problem-solving. Through interactive demonstrations and hands-on activities, students explored how AI-powered tools can be leveraged to generate creative ideas, streamline workflows, and develop practical solutions to real-world challenges. The workshop provided valuable exposure to emerging AI technologies and encouraged participants to adopt AI-driven approaches in academic projects, research, and future career pursuits, fostering a spirit of innovation and continuous learning.

The NEXORA Club of the Department of Artificial Intelligence and Data Science organized the online “Gen AI Weaver Challenge” on 28th March 2026, providing students with an engaging platform to explore the practical applications of Generative AI in data analysis and insight generation. Participants worked with real-world datasets, employed AI-assisted

techniques to process and interpret information, and presented innovative solutions based on their findings. The ideathon-style challenge enhanced students’ analytical thinking, creativity, problem-solving abilities, and teamwork while offering valuable hands-on experience in AI-driven decision-making. Guided by Dr. M. Priya, Professor of AI&DS, the event concluded with interactive presentations and knowledge-sharing sessions that encouraged innovation, collaboration, and deeper exploration of emerging AI technologies.

The NEXORA Club of the Department of Artificial Intelligence and Data Science organized the “GENOVA – Ideathon Event” on 29th March 2026, providing a dynamic platform for students to showcase innovative ideas and AI-driven solutions. Participants demonstrated creativity, analytical thinking, and problem-solving skills by presenting concepts that addressed real-world challenges through the application of Artificial Intelligence. The event fostered teamwork, effective communication, and idea presentation abilities while encouraging students to explore the practical potential of emerging AI technologies. Dr. Vishwesh Nagamalla, Assistant Professor, Sanjivani University, Maharashtra, served as the Jury Member and appreciated the innovative approaches presented by the participants. The ideathon successfully inspired students to think critically, innovate confidently, and contribute to the advancement of AI-based solutions.

The Department of Biomedical Engineering organized an Industrial Visit to Meenakshi Mission Medical College and Hospital, Thanjavur, on 7th January 2026 for First Year Biomedical Engineering students. The visit provided valuable exposure to a real-time healthcare environment,

enabling students to understand the practical applications of biomedical engineering in clinical settings. Participants explored various hospital departments and gained insights into the operation, maintenance, and management of medical equipment, including diagnostic and therapeutic devices, patient monitoring systems, and healthcare safety protocols. Interactions with healthcare professionals enhanced students' understanding of the vital role of biomedical technology in patient care and hospital management. The visit successfully bridged the gap between theoretical learning and practical application while creating awareness of career opportunities in the healthcare and medical technology sectors.

The Department of Biomedical Engineering proudly celebrates the achievement of Ms. R. Surya Prabha and Ms. B. Sharmi, III Year BME students of E.G.S. Pillay Engineering College, for successfully securing a patent design registration for their innovative

project titled “Artificial Forearm” (Design No. 467616-001) from the Patent Office, Government of India. The patented design reflects the students' creativity, technical expertise, and commitment to developing impactful assistive healthcare solutions that enhance the quality of life for individuals requiring upper-limb support. This accomplishment highlights the effective integration of engineering principles with human-centered design and demonstrates the department's strong emphasis on innovation, research, and intellectual property creation. The achievement serves as an inspiration to fellow students and reinforces the institution's commitment to fostering excellence in biomedical innovation and product development.

The Department of Biomedical Engineering proudly celebrates the achievement of a student from E.G.S. Pillay Engineering College who secured the Overall Best Presentation Award at the International Conference on Recent Innovation in Engineering and Technology (ICRIET-2026) held on 27th March 2026

At Sir Issac Newton College of Engineering and Technology. The award-winning research paper, titled “Dual Gate Carbon Nanotube Field Effect Transistor,” was highly appreciated for its innovative approach, technical excellence, and clarity of presentation. This prestigious recognition reflects the student’s dedication to research and academic excellence while highlighting the institution’s commitment to fostering innovation, critical thinking, and quality research. The achievement serves as an inspiration for students to actively engage in research-oriented activities and contribute to advancements in engineering and technology.

The Department of Biomedical Engineering proudly congratulates Ms. M. Vanisri, Ms. J. Varshini, and Ms. A. Yogeshwari, second-year students of E.G.S. Pillay Engineering College, for securing the Best Oral Presentation Award at the International Conference on Recent Innovations in Engineering and Technology (ICRIET-2026) held at Sir Issac Newton College of

Engineering and Technology, Nagapattinam, on 27th March 2026. Their research paper, titled “Exploration and Optimization of Dual Gate Carbon Nano Tube Field Effect Transistor (DG CNTFET) Device,” received appreciation for its innovative approach, technical depth, and effective presentation. This notable achievement reflects the students’ dedication to research, academic excellence, and innovation while showcasing the department’s commitment to nurturing a strong research culture. The accomplishment brings pride to the institution and serves as an inspiration for fellow students to actively engage in research and technological advancements.

The Department of Biomedical Engineering organized an awareness workshop on “Balancing Body and Mind” on 18th March 2026 at the college auditorium. The session was delivered by Dr. Ezhil Ratnakumari, who shared valuable insights on maintaining physical and mental well-being in today’s fast-paced world. The workshop focused on stress management techniques, mindfulness

practices, and healthy lifestyle habits that contribute to overall wellness. Through interactive discussions and engaging activities, students gained a deeper understanding of the importance of achieving a balance between physical health and mental well-being. Convened by Dr. S. Chitra, Head of the Department of Biomedical Engineering, and coordinated by Mrs. S. Suganya and Ms. P. Shobika, Assistant Professors, the programme was highly appreciated by participants for its relevance and practical approach to promoting a healthy and balanced lifestyle.

The Department of Biomedical Engineering achieved remarkable success at the International Conference on Health and Disease Management held at SASTRA Deemed University, Kumbakonam Campus, on 26th February 2026. Demonstrating exceptional research aptitude and academic excellence, six student teams from the department presented their original research papers at the prestigious international forum.

Among them, four teams secured the Best Oral Presentation Award, earning shields and certificates in recognition of their outstanding research quality, innovation, and presentation skills. This significant accomplishment reflects the department’s strong commitment to fostering research, innovation, and scholarly excellence among students. The achievement stands as a testament to the students’ dedication, hard work, and ability to excel on international platforms, bringing pride and recognition to the institution.

The Department of Civil Engineering organized a One-Day Seminar on “Mission Government Job: GATE and Competitive Exam Awareness Programme” on 29th January 2026 for II and III Year Civil Engineering students. The session was delivered by Mr. Francis Xavier E, Junior Engineer, PWD, Karaikal, who provided valuable insights into

government career opportunities for civil engineers and the significance of GATE and other competitive examinations. The programme focused on examination patterns, effective preparation strategies, and career prospects in public sector organizations. Through practical guidance and real-world experiences shared by the resource person, students gained a clearer understanding of the pathways to government employment and higher studies. Coordinated by Mr. R. Rajmohan, Assistant Professor, Civil Engineering, the seminar successfully motivated students to set career goals and prepare strategically for future competitive examinations.

The Department of Civil Engineering organized an inspiring Awareness Programme titled “Turn a Setback into a Comeback” on 30th January 2026 for II, III, and IV Year Civil Engineering students at the SJB Board Room. The session was delivered by Er. Salya P. Sundaravelu, Proprietor of

Salya Construction, Nagapattinam, who shared valuable real-life experiences and practical insights on overcoming challenges, learning from failures, and transforming setbacks into opportunities for success. The programme encouraged students to cultivate resilience, self-confidence, and a positive outlook towards personal and professional growth. Through an engaging and interactive discussion, participants gained motivation to face challenges with determination and perseverance. Coordinated by Mr. A. Pirakasam, Assistant Professor, Civil Engineering, the event left a lasting impact on students and inspired them to remain focused on achieving their academic and career aspirations.

The Department of Civil Engineering inaugurated the III Year Civil Club “GRAVITAS” on 4th February 2026 at the GGB 205 CADD Lab, marking a significant step toward promoting technical excellence, innovation, and professional development among students. The event was organized with the objective of

fostering leadership qualities, teamwork, and industry-oriented learning through various academic and technical activities. Conducted in an enthusiastic and engaging environment, the inauguration encouraged active student participation and highlighted the department’s commitment to nurturing practical skills and innovative thinking among future civil engineers. The programme was convened by Dr. B. Ashwini, Head of the Department of Civil Engineering, coordinated by Mrs. D. Rahini, Assistant Professor, and mentored by Mr. E. Venkatesan, Assistant Professor, making the event a memorable and inspiring beginning for the GRAVITAS Club.

The Department of Civil Engineering successfully organized a Six-Day Online Faculty Development Programme (FDP) on “Data Science for Civil Engineering Professionals” from 16th to 21st February 2026, bringing together 35 participants, including faculty members, research scholars, and postgraduate students from various engineering institutions.

The programme focused on the growing role of data science in transforming civil engineering practices, with sessions covering smart cities, environmental sustainability, real-time construction management, predictive analytics, and data visualization techniques. Through interactive discussions and expert guidance, participants gained valuable insights into integrating advanced data-driven approaches into engineering applications and research. Coordinated by Mr. A. Pirakasam and Mr. S. Shyam Sundar, Assistant Professors, the FDP enhanced professional competencies and promoted the adoption of innovative technologies in the field of Civil Engineering.

The Department of Civil Engineering, in association with the HUB CIVILAX Club, organized an industry-oriented webinar on “Real-Time QA/QC Challenges and Solutions in Metro Construction” on 7th February 2026 for Civil Engineering students. The session was delivered by Er. M. Anburaj, Deputy Manager – QA/QC, Cemindia Project Limited, Chennai, and a distinguished

alumnus of the institution. The webinar provided valuable insights into quality assurance and quality control practices followed in large-scale metro construction projects, emphasizing quality standards, documentation procedures, and compliance requirements. Through real-world examples and professional experiences, students gained a deeper understanding of practical construction challenges and industry expectations. Coordinated by Dr. N. H. Agilandeswari, Associate Professor and Club Coordinator, the programme successfully enhanced students’ technical knowledge and industry readiness in the field of construction engineering.

The Department of Civil Engineering, in association with the GRAVITAS Club, organized an Industry Collaboration Programme on “Smart City Development with Artificial Intelligence” on 9th February 2026 for II, III, and IV Year Civil Engineering students. The programme focused on the transformative role of Artificial Intelligence in modern urban

development and its real-time applications in the civil engineering and construction sectors. With the enthusiastic participation of 50 students, the session provided valuable insights into emerging technologies, smart infrastructure, and innovative engineering solutions that are shaping future cities. The event successfully bridged the gap between academic learning and industry practices, enhancing students’ understanding of technology-driven developments in civil engineering. Coordinated by Mrs. D. Rahini, Assistant Professor, Civil Engineering, the programme was highly informative and beneficial for aspiring engineers.

Twenty-three II and III Year Civil Engineering students participated in a One-Day Workshop on “3D Concrete Printing: Redefining Concrete Construction” held at Vellore Institute of Technology on 13th February 2026. The workshop provided valuable exposure to advanced construction technologies, digital fabrication techniques, and modern automation practices that are

Transforming the construction industry. Students gained insights into innovative construction methods, material optimization, sustainable building approaches, and the growing role of 3D concrete printing in infrastructure development. The programme enhanced their practical knowledge of faster, cost-effective, and environmentally responsible construction processes while encouraging innovative thinking and technological adaptability. The workshop served as an excellent platform for students to explore emerging trends and future opportunities in the field of civil engineering.

The Department of Civil Engineering, in association with the HUB CIVILAX Club, organized a Seminar on “Smart Concrete for Sustainable Construction” on 20th February 2026 for I and II Year Civil Engineering students. The session was delivered by Mr. K. Thavasiraj, Final Year Civil student of EGSPEC, who shared insights into recent advancements in

eco-friendly and sustainable construction materials. The seminar highlighted innovative concepts such as recycled aggregates and nano-enhanced concrete technologies, showcasing their role in transforming modern construction practices. Students gained valuable technical knowledge on sustainable engineering solutions and their real-world applications in the construction industry. The programme inspired participants to adopt innovative and environmentally responsible approaches in civil engineering. The event was successfully coordinated by Dr. N. H. Agilandeswari, Associate Professor and Club Coordinator, ensuring its smooth and effective execution.

The Department of Civil Engineering, in association with the HUB CIVILAX Club, successfully organized the “Blueprint Buildathon 2026” on 16th March 2026 at GGB 206. The event provided an innovative platform for students to transform ideas from blueprint to reality by designing and constructing model structures within a competitive buildathon format. I, II, and III Year Civil Engineering students

actively participated in teams of 2–3 members, showcasing creativity, technical knowledge, and collaborative skills. The competition emphasized smart space planning, design innovation, model detailing, practical considerations such as ventilation, and effective presentation abilities. The programme enhanced students’ problem-solving capabilities, teamwork, and hands-on learning experience in civil engineering design. The event was successfully coordinated by Dr. N. H. Agilandeswari, Associate Professor and Club Coordinator, making it a highly engaging and impactful learning experience.

The Department of Civil Engineering, in association with the Indian Concrete Institute (Trichy Centre), successfully hosted a One-Day National Workshop on “Geopolymer Concrete – A Pathway to Sustainable Building Materials” on 27th March 2026 for II and IV Year Civil Engineering students. The session was delivered by Dr. Sathish Kumar V,

Assistant Professor, National Institute of Technology, Karaikal, who provided in-depth knowledge on the fundamentals of geopolymer concrete, including its constituent materials such as fly ash and GGBS, mix design principles, chemical mechanisms, mechanical properties, and environmental benefits. The workshop emphasized the significant role of geopolymer concrete in reducing CO₂ emissions and promoting sustainable construction practices. Students also gained insights into recent advancements and real-world applications of this innovative material. The event was successfully coordinated by Dr. N. H. Agilandeswari, Associate Professor and Club Coordinator, ensuring its smooth and impactful execution.

An Advanced Course on “Engineering of Special Concretes with Focus on Sustainability, Rheology, and Microstructural Characterisation” was conducted at CSIR–SERC, Chennai, from 7th to 9th January 2026, aimed at providing in-depth knowledge on the latest advancements in special concrete technologies. The programme emphasized sustainable construction practices,

Rheological behavior of concrete, and microstructural analysis of materials, offering participants valuable insights into modern developments in civil engineering. Mr. R. Rajmohan, Assistant Professor, and Mr. K. Thavasiraj, Final Year Civil Engineering student, actively participated in the course and gained exposure to advanced material properties, innovative mix design approaches, and contemporary testing techniques used in the construction industry. The programme significantly enhanced their understanding of sustainable materials and their role in improving the performance and durability of concrete structures.

Students of the Department of Civil Engineering participated in a One-Day Workshop on “DTCP Norms and Building Approval Procedures” organized by the Department of Civil Engineering, Kongunadu College of Engineering & Technology, on 30th January 2026. The workshop provided valuable insights into building approval processes, development regulations, and government norms associated with modern infrastructure projects. Through this industry-oriented programme, students gained practical knowledge of

real-world construction approval procedures, enhancing their professional competency and preparedness for careers in the civil engineering sector.

The Department of Civil Engineering proudly recognizes the participation of Mr. K. Thavasiraj and Mr. R. Lokesh in the “Bridge It” event conducted as part of Gyanith '26, a prestigious national-level technical fest organized by the National Institute of Technology, Puducherry, on 27 and 28 February 2026. The event provided an excellent platform for students to demonstrate their technical expertise, problem-solving skills, and innovative thinking in bridge design and structural engineering concepts.

Their participation enhanced their practical knowledge, teamwork, and exposure to competitive technical environments, reflecting the department’s commitment to fostering experiential learning and professional development among students.

The Department of Civil Engineering proudly acknowledges the participation of Dr. N. H. Agilandeswari, Associate Professor, in the One-Day Workshop on “Advances in Precast Prestressed Concrete Structures” conducted at the National Institute of Technology, Tiruchirappalli, on 9 January 2026. The workshop provided valuable insights into the latest developments in precast and prestressed concrete technologies, covering innovative design methodologies, advanced

construction practices, and their applications in modern infrastructure projects. Her participation enhanced her expertise in structural engineering and offered exposure to current research trends and industry best practices. The knowledge gained through this programme will contribute significantly to academic enrichment and strengthen the quality of teaching, research, and professional development within the department.

The Department of Computer Science and Engineering, through the Designers Domain Club, successfully organized a guest lecture and hands-on workshop titled “The Tkinter Jet: Empowering Students with GUI Development Skills” on 5 February 2026 at the CC2 Lab. The session was led by Dr. K. Aruna, Assistant Professor from A.V.C. College of Engineering, who introduced students to Python Tkinter, graphical user

interface (GUI) components, and event-driven programming concepts. Through live coding demonstrations, practical exercises, and interactive discussions, participants gained valuable hands-on experience in developing user-friendly applications. The workshop enhanced students’ programming skills, strengthened their understanding of GUI development, and boosted their confidence in building real-world software applications.

The Department of Computer Science and Engineering, through the Designers Domain Club, successfully organized the “Prompt to Pixel Challenge: Unleashing Creativity through AI” on 5 February 2026. The two-round competition encouraged students to explore the creative capabilities of Artificial Intelligence through poster design and visual storytelling.

Participants initially created AI-generated posters on the theme “Future of Humanity with AI,” while the finalists advanced to an offline round where they developed dynamic visual stories using AI-based video generation and prompt engineering techniques. The event provided valuable hands-on experience in digital content creation, enhanced students’ creative and technical skills, and showcased the transformative potential of AI in modern design and media.

The Department of Computer Science and Engineering, through the Designers Domain Club, organized an online technical webinar on 8 February 2026 for CSE students. The session attracted 48 enthusiastic participants and provided valuable insights into emerging technologies and their practical applications. Through interactive discussions and knowledge-sharing activities, the programme encouraged students to explore innovative concepts, strengthen their technical understanding, and develop an interest in evolving technological domains.

The webinar served as an effective platform for enhancing learning, fostering curiosity, and promoting awareness of current industry trends among aspiring engineers.

The Department of Computer Science and Engineering, through the Designers Domain Club, successfully organized an online technical webinar titled “CircuitJam: Igniting Innovation in Electronics and Embedded Systems” on 13 February 2026. The session was delivered by Mr. M. Sadagopan, Founder and CEO of ELECTROMEDICS, who shared valuable insights into electronic circuit fundamentals, embedded technologies, and their real-world applications. Attended by 48 enthusiastic students, the webinar effectively bridged the gap between academic concepts and industry practices through the speaker’s entrepreneurial experiences. The programme inspired participants to explore innovation, startup opportunities, and practical problem-solving in the fields of electronics and embedded systems, fostering a spirit of creativity and technological advancement.

The Department of Computer Science and Engineering, through the Designers Domain Club, organized an online Alumni Interaction and Motivational Talk titled “The Importance of DSA in Software Engineering: Building the Foundation for Future Developers” on 21 February 2026. The session was delivered by Mr. Kumaran Renganathan, Senior Software Engineer at Cognizant, Chennai, who emphasized the significance of Data Structures and Algorithms (DSA) in developing efficient software solutions and succeeding in technical interviews. Through practical examples involving arrays, linked lists, and trees, the speaker provided valuable insights into real-world software engineering applications. The programme benefited 32 students by enhancing their understanding of core programming concepts, career planning strategies, and placement preparation for leading IT organizations.

The Department of Science and Humanities, in association with the Designers Domain Club and the Institution’s Innovation Council, successfully organized “Efficiency Expo 2026” on 2 March 2026 to foster innovation and problem-solving skills among students. The event encouraged participants to develop creative, technology-driven solutions to real-world challenges through a two-stage competition. Approximately 30 teams submitted project abstracts during the initial online screening phase, from which 10 outstanding teams were shortlisted for the final round. The finalists presented their ideas through offline PowerPoint presentations at SJB 316, where they were evaluated based on originality, feasibility, and presentation clarity. The expo provided an excellent platform for students to showcase their innovative thinking, technical knowledge, and entrepreneurial mindset while addressing contemporary societal and technological issues.

The Department of Computer Science and Engineering achieved a notable milestone in innovation and intellectual property development with the successful design registration of a “Digital Study Table” under the Designs Act, 2000, granted by the Patent Office, Government of India. Officially registered under Class 06-03, the innovative design was developed by faculty members, including Mr. Senthilkumar Pillay and Dr. Shankar Ganesh Pillay, reflecting the department’s commitment to fostering creativity, research, and practical technological solutions. This achievement highlights the institution’s dedication to innovation-driven education and its efforts to transform novel ideas into recognized intellectual assets that contribute to academic and societal advancement.

The Department of Computer Science and Engineering proudly celebrates the placement success of its students during the 2025–26 academic year. Demonstrating their technical competence and professional readiness, Aishwarya S., Mahalakshmi D., Mohamed Kaleel M., Divyadharshini M., and Sri Jagan secured employment opportunities at HackGeniX with an annual package of ₹3 LPA. This achievement reflects the department’s continuous efforts to provide quality education, skill-based training, and industry-oriented learning experiences.

Guided by the motto “Innovate with Precision,” the department remains committed to empowering students with the knowledge and competencies required to excel in the competitive technology sector and build successful professional careers.

The Department of Computer Science and Engineering proudly recognizes the research achievement of student K. Pradeepa, who presented a paper titled “Federated Learning for Secure and Private Data Analysis in Decentralized Networks” at the IEEE International Conference on Modern Electronics Devices and Intelligent Communication Systems (MEDCOM-2025), held from 11 to 13 December 2025 at

GL Bajaj Institute of Technology and Management, Greater Noida. Technically co-sponsored by the IEEE Computational Intelligence Society, the conference provided a prestigious platform to showcase innovative research in emerging technologies. The presentation highlighted advanced approaches to ensuring data security and privacy in decentralized networks, reflecting the student’s research excellence and the department’s commitment to fostering innovation, academic scholarship, and cutting-edge technological advancements.

The Department of Computer Science and Engineering proudly celebrates the international research achievement of M. Kalaivani, who presented a research paper titled “An Evolutionary Deep Learning Framework for Early Liver Cancer Detection via Genetic Algorithm-Driven Feature and Hyperparameter Optimization” at the 6th International Conference on Image Processing

and Capsule Networks (ICIPCN 2026), organized by Kathmandu University, Nepal, from 27 to 29 January 2026. The research showcased innovative applications of artificial intelligence and deep learning in healthcare, focusing on improving the early detection of liver cancer through advanced optimization techniques. This accomplishment reflects the department’s commitment to promoting cutting-edge research, global academic engagement, and the development of AI-driven solutions that address critical healthcare challenges.

The Department of Computer Science and Engineering, in association with the Programmers Paradise Club, successfully organized a five-day “AWS Cloud Practitioner Workshop: Building Future-Ready Cloud Skills” from 16 to 20 February 2026. Conducted at SJB 321 by Dr. Noorul Ameen J, an AWS Certified Cloud Educator, the workshop provided students with comprehensive training on AWS cloud architecture, deployment models, and industry best practices. Through hands-on learning experiences and practical demonstrations, participants gained valuable insights into cloud computing technologies and their real-world applications. The programme enhanced students’ technical competencies, prepared them for industry-recognized cloud certifications, and strengthened their readiness for careers in the rapidly evolving cloud computing domain.

The Department of Computer Science and Engineering proudly recognizes the research achievement of faculty members S. Manikandan and D. Vijayakumar, who published a paper titled “Secure Cloud-Based Wearable Sensor Networks for Teaching Effectiveness Evaluation in Physical Education Through Virtualized Load Balancer” in the International Journal of Computational Intelligence Systems on 23 February 2026.

We are providing an unedited version of this manuscript to give early access to its findings. Before final publication, the manuscript will undergo further editing. Please note there may be errors present which affect the content, and all legal disclaimers apply.

If this paper is publishing under a Transparent Peer Review model then Peer Review reports will publish with the final article.

The research explores the integration of cloud computing, wearable sensor networks, and artificial intelligence-driven analytics to enhance teaching effectiveness evaluation while ensuring secure and efficient data processing. This noteworthy publication highlights the department’s commitment to interdisciplinary research, technological innovation, and the development of intelligent solutions that contribute to the advancement of modern education systems.

The Department of Computer Science and Engineering proudly congratulates Dr. A. Emmanuel Peo Mariadass on successfully clearing the Wipro TalentNext Certification Assessment under the Digital Skills Readiness Program on 17 March 2026. This achievement recognizes him as a certified mentor for Project-Based Learning (PBL) in Java Full Stack Development, reflecting his expertise in industry-relevant technologies and modern teaching methodologies. The certification demonstrates the department's commitment to aligning academic practices with current IT industry standards and enhancing the quality of technical education. Such accomplishments strengthen the institution's efforts to equip students with practical skills and industry-oriented learning experiences, fostering greater career readiness and professional excellence.

The Department of Computer Science and Engineering successfully organized an Industry–Academia Technical Interaction Program titled “From ‘Hello World’ to Production: AI-Augmented Development” on 13 March 2026 at the CC-2 Lab. The session was delivered by Mr. Abinash M, Senior Software Engineer at Holistic MD LLP, Coimbatore, who shared valuable insights into the journey from fundamental programming concepts to the deployment of real-world software applications using modern AI-powered development tools. The programme provided students with a deeper understanding of industry expectations, software engineering practices, and emerging technological trends. By bridging the gap between academic learning and

professional requirements, the interaction equipped participants with practical knowledge and enhanced their readiness for careers in the rapidly evolving technology sector.

The Department of Computer Science and Engineering proudly congratulates Professor N. Kannan on successfully clearing the Wipro TalentNext Java Full Stack Certified Faculty Assessment (WCF Slot 2) conducted during February 2026. Demonstrating exceptional proficiency in Java Full Stack development, he secured an impressive overall score of 91.00%, earning official certification from the Wipro TalentNext program. This achievement validates his technical expertise and qualifies him to mentor students through industry-aligned project-based learning frameworks.

The certification reflects the department's commitment to academic excellence, continuous professional development, and the integration of industry-relevant skills into the teaching and learning process, ultimately benefiting students in their career preparation and technical growth.

Participants gained practical exposure to creating interactive dashboards and understanding data-driven decision-making processes. An engaging quiz session reinforced key concepts, benefiting both beginners and advanced learners. Mentored by Mrs. V. Meenakshi and convened by Dr. S. Praveenkumar, the event enhanced students' analytical capabilities and provided valuable insights into industry-relevant data visualization techniques. Certificates were awarded to all participants in recognition of their active involvement.

The Biz-Nova Club of the Department of Computer Science and Business Systems (CSBS) organized an exclusive webinar on “Agentic AI for Entrepreneurs” on 8 February 2026 through Webex. The session was delivered by Mr. Gifton Tom Biju, Founder and CEO of Tomatrix Technologies Pvt. Ltd., who shared valuable insights into the transformative role of Agentic AI and Generative AI in modern entrepreneurship. Through real-world examples from leading platforms such as Uber and Ola, participants gained an understanding of how artificial intelligence enhances customer experience, decision-making, operational efficiency, and business growth. The webinar provided students with conceptual clarity on emerging AI technologies and inspired them to explore AI-driven innovation, automation, and leadership opportunities in the entrepreneurial ecosystem.

The Biz-Nova Club of the Department of Computer Science and Business Systems (CSBS) successfully organized a hands-on training programme on “Intelligent Image Plagiarism Detection Systems” on 27 February 2026 at CC4 Lab, GG Block. The session introduced participants to the concepts and techniques behind AI-powered image plagiarism detection and featured a live demonstration of a student-developed web-based application. Students gained practical exposure to

coding practices, backend logic implementation, web page design, and the complete development lifecycle from system design to deployment. Conducted in a collaborative learning environment by Biz-Nova Club members, the training enhanced participants’ technical competencies, strengthened their confidence in developing intelligent systems, and fostered an innovative mindset toward creating AI-driven solutions for real-world challenges.

The TechnoVertz Club successfully organized a live webinar on “Power Automate – A No-Code Automation Tool” on 8 February 2026 through Webex, bringing together 50 students and faculty members to explore the latest trends in workflow automation and digital transformation. The session was led by Mr. Arun Kumar, Senior Consultant at EY Company Pvt. Ltd., who introduced participants to Microsoft Power Automate and demonstrated how organizations use no-code solutions to streamline business processes, integrate applications, and improve operational efficiency. Through practical demonstrations and real-world examples, attendees gained valuable insights into business process automation and the growing role of automation technologies in modern enterprises. The programme received an overwhelmingly positive response, with 92% of participants rating it as “Excellent,” highlighting its relevance, clarity, and industry-oriented learning outcomes.

The Department of Computer Science and Business Systems (CSBS) demonstrated a strong commitment to academic excellence and continuous professional development during February 2026, with faculty members actively participating in several Faculty Development Programmes (FDPs) conducted by reputed institutions across the country. Faculty members attended programmes on emerging areas such as Artificial Intelligence,

AI Agents, Project Management, Research Publications, and Patent Development, enhancing their knowledge and professional competencies. Notably, Mrs. S. Angelin Nivedita, Mrs. S. Shajathi Begam, and Mrs. Lalithakamalam L successfully completed the prestigious “Roadmap to India AI Future” five-day webinar organized by Hindustan Institute of Technology and Science, Chennai, an official pre-summit event of the India AI Impact Summit 2026, earning national-level certification. These achievements reflect the department’s dedication to fostering lifelong learning, embracing technological advancements, and strengthening the quality of teaching, research, and innovation.

The TechnoVertz Club of the Department of Computer Science and Business Systems (CSBS) organized an expert session on “Next-Gen Digital Marketing Techniques Using SEO, PPC & Web Analytics Tools” on 1 March 2026 through Cisco Webex. The session was delivered by Mr. Bhuvanesh M, Manager, Digital Web Solutions, Haryana, and witnessed the enthusiastic participation of around 50 students.

Participants were introduced to modern digital marketing strategies, including Search Engine Optimization (SEO), Pay-Per-Click (PPC) advertising, and web analytics tools, gaining valuable insights into how businesses enhance online visibility and analyze customer behavior. Through real-world case studies and industry-oriented discussions, the programme effectively bridged the gap between academic concepts and professional digital marketing practices. The session received an excellent response, with 95% of participants rating it highly and expressing interest in exploring career opportunities in the rapidly growing digital marketing domain.

The TechnoVertz Club of the Department of Computer Science and Business Systems (CSBS) successfully organized “TECHTRIX – The Ultimate Technical Challenge” on 23 March 2026 at CC4 Lab, E.G.S. Pillay Engineering College. The competition brought together 50 enthusiastic students who participated in three

engaging rounds—TechPuzzle, Spin Challenge, and TechSol—designed to assess technical knowledge, logical reasoning, creativity, and problem-solving abilities. Evaluated by Ms. E. Saranya, Assistant Professor, Department of Computer Science and Engineering, the event provided a dynamic platform for students to apply their skills in real-time technical scenarios. Conducted in a competitive yet collaborative environment, TECHTRIX enhanced participants’ critical thinking, decision-making, teamwork, and communication skills while boosting their confidence in tackling practical challenges encountered in the professional world.

The TechnoVertz Club of the Department of Computer Science and Business Systems (CSBS) successfully organized a UI/UX Design Bootcamp on 14 March 2026 through the Webex platform, attracting nearly 80 students and emerging as the highest-attended event of the month. The session was led by Mr. Daniel Pushparaj, M.Des (IIT Jodhpur), Former Associate Product Designer at IMPRZD, who provided an engaging introduction to

The fundamentals of User Interface (UI) and User Experience (UX) design. Participants gained valuable insights into user-centered design principles, design thinking methodologies, wireframing, prototyping, and industry-standard design workflows used in digital product development.

A key highlight of the bootcamp was the discussion on the growing influence of Artificial Intelligence in the design domain, showcasing how AI tools are transforming design processes through automation, personalization, and user behavior analysis. The programme enhanced students' creativity, critical thinking, and problem-solving abilities while creating awareness about the expanding career opportunities in UI/UX design. Through practical examples and industry-oriented perspectives, the bootcamp equipped participants with a strong foundation in modern design practices and inspired many to explore UI/UX as a promising career path in the technology industry.

The Department of Computer Science and Business Systems (CSBS) proudly congratulates Ms. S. Shajathi Begam, Assistant Professor, on the publication of her research paper titled “Web Development for Crop Yield Prediction Using Machine Learning Algorithms” in the International Journal of Research Publication and Reviews (IJRPR), Volume 7, Issue 3, on 21 March 2026.

The study integrates modern web development technologies with machine learning techniques to provide data-driven crop yield predictions, addressing key challenges in agriculture and supporting sustainable farming practices. This achievement highlights the faculty member’s contribution to agricultural informatics and applied machine learning research, while reinforcing the department’s commitment to innovation, research excellence, and the development of technology-driven solutions with meaningful societal impact.

The Department proudly recognizes the enthusiastic participation of its students in the technical events conducted at IIT Research Park and Catalyst 2026 on 7 February 2026. The events provided an excellent platform for students to enhance their technical knowledge, explore innovative ideas, and gain valuable exposure to emerging technologies and industry practices. Through their active involvement,

The participants demonstrated a strong commitment to learning, professional growth, and academic excellence. The department congratulates the students for representing the institution with dedication and encourages them to continue engaging in such opportunities that foster innovation, skill development, and career readiness.

The Department of Electronics and Communication Engineering proudly highlights the active participation of its faculty members in various professional development and certification programmes conducted during July–October 2025. Covering emerging areas such as Microsensors and Nanosensors, Signal Processing Algorithms and Architectures, and 5G Networks, these programmes enhanced the faculty’s technical expertise, research capabilities, and understanding of advanced engineering technologies. Their commitment to continuous learning reflects the department’s focus on academic excellence, innovation, and staying aligned with evolving industry trends. The knowledge gained through these initiatives contributes significantly to improving teaching

practices, strengthening research activities, and providing students with industry-relevant learning experiences in the field of Electronics and Communication Engineering.

The Department of Electronics and Communication Engineering proudly appreciates the participation of Mr. Akash A. (Register Number: 2403820810621014), a II Year ECE student, in the educational visit and training programme conducted at the Kudankulam Nuclear Power Plant from 19 January 2026 to 31 January 2026. The programme provided valuable exposure to nuclear power generation, plant operations, safety protocols, and advanced technologies used in the energy sector. Through this industrial learning experience, the student gained practical insights into real-world engineering applications and scientific advancements. His active participation reflects a strong commitment to technical learning, professional development, and industry-oriented knowledge acquisition.

The Department of Electronics and Communication Engineering proudly highlights the research presentation of Dr. S. Senthilkumar and Mrs. M. Kavitha at the 6th International Conference on Image Processing and Capsule Networks (ICIPCN 2026), held from 27 to 29 January 2026 at Kathmandu University. The faculty members presented a paper titled “A Raspberry Pi-Based Intelligent System for Detecting Vitamin Deficiencies using

Image Analysis and Lightweight Deep Learning Models,” showcasing innovative applications of artificial intelligence, image processing, and embedded systems in healthcare diagnostics. This work reflects the department’s commitment to interdisciplinary research and its focus on developing intelligent, technology-driven solutions for real-world healthcare challenges. The achievement also reinforces the institution’s dedication to academic excellence, research innovation, and global knowledge dissemination.

The Department of Electronics and Communication Engineering is pleased to report the successful completion of the Six-Day Online ATAL Faculty Development Programme (FDP) on “Recent Trends in Solar Energy Conversion: From Silicon to Perovskite Photovoltaics,” held from 5 January 2026 to 10 January 2026 and organized by Jawahar Education Society’s A.C. Patil College of Engineering.

The programme provided an enriching platform for educators, researchers, and industry professionals to explore emerging advancements in solar energy technologies, with a focus on the transition from conventional silicon-based photovoltaics to next-generation perovskite solar cells. The FDP was coordinated by Ms. B. Prabavathy, Assistant Professor, Department of Electronics and Communication Engineering, and successfully facilitated knowledge sharing on innovative trends in renewable energy systems. This initiative reflects the department’s commitment to continuous learning, academic excellence, and advancement in sustainable energy research.

The Department of Electronics and Communication Engineering is pleased to highlight the successful completion of the Six-Day Online ATAL Faculty Development Programme (FDP) on “Next Generation Semiconductor Technologies: Design, Fabrication, and Applications in AI, IoT and 5G Systems,” held from 18 January 2026 to 24 January 2026 and organized by Sahrdaya College of Engineering and Technology.

The programme, coordinated by Ms. B. Prabavathy, Assistant Professor, provided a comprehensive platform for exploring modern semiconductor chip design and fabrication techniques, along with their critical applications in emerging technologies such as artificial intelligence, Internet of Things (IoT), and 5G communication systems. The FDP offered valuable insights into advanced semiconductor technologies and their role in enabling next-generation intelligent systems. This initiative reflects the department’s commitment to continuous professional development, research advancement, and strengthening expertise in cutting-edge electronic and communication technologies.

The Technocrat Club of the Department of Electronics and Communication Engineering successfully organized a webinar on “Fundamentals of Cadence” under the domain EDA Tools 1 on 25 January 2026 through the WebEx platform from 11:00 AM to 12:00 Noon. The session was conducted by Anbarasi P and Dharunima P, III-year ECE students, who delivered an informative presentation on the basics and applications of Cadence tools in VLSI design.

The programme was organized under the guidance of Dr. M. Malathi, Professor & Head of the Department, and coordinated by Mrs. R. Mythily, Assistant Professor. The webinar provided valuable insights into electronic design automation tools and proved beneficial for students by enhancing their understanding of VLSI design concepts and industry-relevant software tools, thereby supporting practical and technical skill development in the field of Electronics and Communication Engineering.

The EMBEX Club of the Department of Electronics and Communication Engineering successfully organized a webinar on “Understanding VLSI: From Transistors to Chips” on 11 January 2026 from 10:00 AM to 11:00 AM. The session was conducted by Ruwaidha A and Vanathi S, II-year ECE students, who provided an insightful introduction to the fundamentals of VLSI technology and chip design concepts. The webinar was organized under the guidance of Dr. M. Malathi, Professor & Head of the Department, and coordinated by Mrs. P. Janani Durga, Assistant Professor. The programme offered a clear and informative overview of semiconductor technologies, enhancing participants’ understanding

of VLSI systems and strengthening their foundational knowledge in electronics and chip design. The session was found to be highly useful and academically enriching for all participants.

The EMBEX Club of the Department of Electronics and Communication Engineering successfully organized a workshop titled “VLSI Edition” on 22 January 2026. The session was conducted by Kanishka V and Grophin J, III-year ECE students, who shared valuable insights into VLSI concepts, design methodologies, and their applications in modern electronic systems. Organized under the guidance of Dr. M. Malathi, Professor and Head of the Department, and coordinated by Mrs. P. Janani Durga, Assistant Professor, the workshop provided an interactive learning environment that enhanced participants’ understanding of semiconductor design and VLSI technology. The programme proved highly beneficial for students by strengthening their technical knowledge and encouraging interest in advanced electronics and chip design domains.

The faculty members of the department have demonstrated remarkable research excellence through their publications in Scopus-indexed IEEE international conferences during 2025 and 2026. Their research contributions span emerging and impactful domains such as Graph Neural Networks, Recommendation Systems, Power Electronics, Semiconductor Device Modeling, Image Processing, and Deep Learning Applications.

These achievements reflect the faculty's commitment to advancing knowledge, fostering innovation, and addressing contemporary technological challenges through high-quality research. The publications have not only strengthened interdisciplinary collaboration and academic engagement but have also enhanced the institution's visibility and reputation within the global research community, reinforcing its dedication to excellence in research, innovation, and technological advancement.

The Department of Electronics and Communication Engineering proudly highlights the active participation of five faculty members in various national-level online Faculty Development Programmes (FDPs) conducted during February and March 2026. These professional development initiatives provided valuable opportunities to strengthen technical expertise, enhance teaching competencies, and gain deeper

insights into emerging technologies and current industry trends. Through their engagement in these programmes, the faculty members enriched their academic knowledge, research capabilities, and professional skills, thereby contributing to excellence in teaching, innovation-driven learning, and quality education. Such continuous professional development reflects the department's commitment to fostering academic growth, research excellence, and industry-oriented education.

The Department of Electronics and Communication Engineering is proud to announce the receipt of a seminar grant of ₹30,000 from the Council of Scientific and Industrial Research (CSIR), New Delhi, for organizing a two-day national-level seminar on “Wearable Devices – Challenges and Innovations.” This financial support reflects the recognition of the department’s efforts in promoting research and innovation in emerging technological domains. The seminar served as a valuable platform for academic enrichment, knowledge sharing, and collaborative discussions among researchers, faculty members, and students. The initiative significantly contributed to advancing awareness of wearable technologies and intelligent systems while strengthening the institution’s commitment to research excellence, innovation, and technology-driven learning.

The Department of Electronics and Communication Engineering proudly recognizes the valuable contribution of Dr. S. Senthilkumar, who served as a guest speaker and technical expert in two academic sessions conducted on 11 March 2026 and 24 March 2026 by the Departments of Computer Science and Engineering and Electrical and Electronics Engineering, EGSPEC. Through these expert lectures, he shared insights on emerging technologies, online education, and embedded systems, fostering technical awareness and professional growth among students and faculty members.

The sessions provided a platform for knowledge exchange, encouraged continuous learning, and enhanced participants’ understanding of contemporary technological developments. This achievement reflects the department’s commitment to academic excellence, interdisciplinary collaboration, and the dissemination of industry-relevant knowledge.

The Department of Electrical and Electronics Engineering (EEE), in association with EmCog Solutions Pvt. Ltd., Chennai, successfully organized a six-day Value Added Course on “Learn, Code and Build Charging Algorithm Hardware for Battery Energy Storage System”

from 16 February 2026 to 23 February 2026 for final-year EEE students. The programme provided comprehensive training in Battery Energy Storage Systems (BESS), charging algorithms, STM-based embedded programming, hardware interfacing, and real-time implementation of charging control strategies. Through a blend of theoretical sessions, hands-on coding exercises, and hardware prototyping activities conducted by industry experts, students gained valuable practical exposure to emerging energy technologies and industry-oriented tools. The course significantly enhanced participants’ technical competencies, bridged the gap between academic learning and industrial applications, and reinforced the department’s commitment to skill development, innovation, and career-ready engineering education.

The Department of Electrical and Electronics Engineering (EEE), in association with the Youth Red Cross (YRC), successfully organized an awareness programme titled “Breathe Free – A Tobacco Awareness Initiative” on 10 March 2026 at GGB 309. The programme aimed to educate students about the harmful effects

of tobacco consumption and promote a healthy, tobacco-free lifestyle. Dr. K. Vinoth Krishnan, District Consultant, National Tobacco Control Programme (NTCP), along with his team, delivered an informative session highlighting the health risks associated with tobacco use and the importance of prevention and awareness. Around 60 students from various departments actively participated in the event, which fostered greater awareness, social responsibility, and commitment towards creating a healthier community. The initiative reflects the institution’s dedication to promoting student well-being and supporting public health awareness programmes.

The Department of Electrical and Electronics Engineering (EEE) successfully organized a career guidance programme titled “Winning Strategy in TNEB Exam” under Talent Talks 2K26 on 8 March 2026 through Google Meet. The session was delivered by Mr. R. Kirubanandhan, Assistant Engineer (Electrical), Tamil Nadu Housing Board, Chennai, who shared valuable insights into the Tamil Nadu Electricity Board (TNEB) examination and effective preparation strategies. The programme covered key aspects such as examination patterns, subject-wise preparation techniques, time management, and common pitfalls to avoid, providing students with a structured approach to competitive exam success. The interactive session enhanced participants’ confidence, motivation, and career readiness, while reinforcing the department’s commitment to supporting students in achieving their professional goals in the electrical engineering sector.

The Department of Electrical and Electronics Engineering (EEE) successfully conducted a live technical demonstration session on Electrical Machines for MECH-A students on 11 April 2026. The programme, led by Dr. K. Nanda Kumar, Professor, EEE, provided students with

valuable hands-on exposure to the construction and operation of transformers, DC generators, and single-phase induction motors. Through real-time demonstrations and interactive discussions, participants gained a deeper understanding of fundamental electrical engineering concepts, including electromagnetic induction, energy conversion, voltage regulation, and motor operation. The session effectively bridged the gap between theoretical learning and practical application, enhancing students’ technical knowledge, analytical skills, and appreciation of real-world engineering systems while promoting experiential and interdisciplinary learning.

The Department of Electrical and Electronics Engineering (EEE) successfully organized an Alumni Talk on 5 February 2026 at the Simulation Lab, offering students valuable insights into industry practices and career development. The session was delivered by Mr. P. Deepak, a distinguished alumnus and Testing and Commissioning Engineer at Al Gurg Automation

and Controls, Dubai, UAE, who shared his professional experiences in automation systems, testing procedures, and commissioning activities. The programme highlighted the importance of technical expertise, adaptability, and continuous learning in today's competitive engineering landscape. Through an engaging interactive session, students gained a deeper understanding of industry expectations, emerging career opportunities, and professional growth pathways. The event served as an effective platform for industry-academia interaction, reinforcing the vital role of alumni in mentoring students and supporting their transition from academic learning to professional success.

The Department of Electrical and Electronics Engineering (EEE), EGS Pillay Engineering College, successfully organized a “Way to Ideathon” Guest Lecture on “SCADA in the Era of Industry 4.0” on 24 February 2026 at the Simulation Lab. The session was delivered by Ms. N. Ramya, Tutor, Department of EEE, who provided valuable insights into the fundamentals of Supervisory Control and Data Acquisition (SCADA) systems, their industrial applications, and their integration with Industry 4.0 technologies. The lecture highlighted the role of automation, intelligent monitoring, and digital transformation in enhancing industrial efficiency and reliability. Students actively participated in discussions on emerging automation trends and innovative industrial solutions, gaining a deeper

understanding of modern smart manufacturing environments. The programme served as an enriching platform for knowledge sharing and inspired students to explore advanced technologies shaping the future of industry.

The Department of Electrical and Electronics Engineering (EEE), EGS Pillay Engineering College, organized a one-day educational visit to the National Institute of Technology (NIT), Tiruchirappalli, on 26 February 2026 for second-year EEE students. The visit provided participants with an opportunity to explore the academic environment, advanced laboratories, research facilities, and student activity centers

of one of India's premier engineering institutions. Through this exposure, students gained valuable insights into higher education, research excellence, and the professional standards expected in leading academic institutions. The educational tour served as an inspiring learning experience, motivating students to pursue academic excellence, strengthen their career aspirations, and strive for greater achievements in their engineering journey.

The Department of Information Technology proudly congratulates Ms. Hema R on receiving the NPTEL Day 2K26 Certificate of Appreciation for her valuable contribution as a mentor for the NPTEL Online Certification course "Privacy and Security in Online Social Media" during the July–December 2025 session. Through her dedicated guidance and continuous support, she played a significant role

in helping students successfully engage with the course and strengthen their understanding of online privacy and cybersecurity concepts. This recognition reflects her commitment to academic excellence, student development, and the promotion of quality learning through online education initiatives.

The Department of Information Technology organized a motivational webinar titled “An Ordinary Journey to an Extraordinary Goal” on 22 February 2026 through virtual mode as part of its academic activities for the Even Semester 2025–2026. The session was delivered by Ms. Abarna Ragavan, Junior Assistant, Treasury and Accounts Department,

Thiruvarur, who shared her inspiring journey of perseverance, hard work, and success. The webinar emphasized the importance of discipline, time management, resilience, and continuous learning in achieving personal and professional goals. Students gained valuable insights into overcoming challenges, setting clear career objectives, and developing a positive mindset toward lifelong growth. The programme served as a motivating and impactful experience, encouraging participants to pursue excellence with determination, dedication, and strong ethical values.

The Department of Information Technology successfully organized an SDG 6.2 awareness programme titled “From Sanitation to Safety: Why Hygiene is a Public Health and Gender Issue – What We Can Do” on 22 February 2026 through online mode. The session was delivered by Mrs. S. Pichammal, Manager – Quality and Compliance, Sugah Healthcorp Pvt. Ltd., who highlighted the importance of sanitation, personal hygiene, and women’s health in promoting overall well-being and gender equality. The programme emphasized daily hygiene practices, the prevention of infections, and the role of individual responsibility in creating a healthier society. Students actively participated in the interactive session and engaged enthusiastically in a Kahoot-based quiz competition, making the programme both

informative and engaging. The initiative successfully enhanced awareness of public health, hygiene, and sustainable development goals while encouraging students to adopt positive behavioural changes and contribute to a safe and healthy community.

The Department of Information Technology proudly appreciates P. Jeevitha for actively participating in the “Ideation Cloud Verse” event conducted by the Cool Coders Club on 2 March 2026 at EGS Pillay Engineering College. The event served as a platform for students to showcase innovative ideas, enhance creative

thinking, and explore technology-driven solutions to real-world challenges. Through active engagement in the programme, the participant gained valuable exposure to ideation techniques and problem-solving approaches, reflecting the department’s commitment to fostering innovation, creativity, and entrepreneurial thinking among students.

The Department of Information Technology successfully organized a Hands-on Workshop on Cloud Computing titled “An Overview of Cloud Services with a Practical Approach” on 20 February 2026 for IT students. The session was conducted by Mr. S. Ramprakash, M.E., (Ph.D.), who provided valuable insights into cloud computing concepts, service

models, and real-world industry applications. Through interactive demonstrations and practical exercises, students gained hands-on experience with cloud technologies and developed a better understanding of modern computing environments. The workshop enhanced participants’ technical knowledge, exposed them to emerging cloud-based solutions, and strengthened their readiness for industry-oriented careers in information technology.

The Department of Information Technology successfully organized a six-hour Hands-on Workshop on “Git and SDLC Fundamentals” on 19 February 2026 at CC3 for IT students. The session was conducted by Mr. Kumaran Renganathan, Senior Software Engineer, Cognizant, Chennai, who provided practical training on Git commands, repository management, version

control practices, and Software Development Life Cycle (SDLC) concepts. Through interactive demonstrations and hands-on activities, students gained valuable exposure to modern software development workflows and industry best practices. The workshop enhanced participants’ technical competencies, strengthened their understanding of collaborative software development, and prepared them for real-world industry expectations.

The Department of Information Technology successfully organized a Talent Talk session titled “Classroom to Corporate – How to Crack Interviews and Industry Expectations” on 27 February 2026 for IT students. The programme focused on equipping students with essential employability skills required to succeed in today’s

competitive job market. Key topics included interview preparation strategies, effective communication skills, resume building techniques, and an understanding of current industry expectations. Through insightful discussions and practical guidance, students gained valuable exposure to corporate culture, placement readiness, and professional development practices. The session served as an important platform for bridging the gap between academic learning and corporate requirements, enhancing students’ confidence and career preparedness.

The Department of Mechanical Engineering is pleased to highlight the successful participation of Mr. Ilamvazhuthi C in a one-week Faculty Development Programme (FDP) on “AI and IoT – Enabling Sensing and Decision Making System” conducted from 29 December 2025 to 2 January 2026.

The programme was organized by Brahmddevdada Mane Institute of Technology, Solapur, in association with The Institution of Engineers (India), Solapur Local Centre. The FDP provided valuable insights into emerging technologies such as Artificial Intelligence, the Internet of Things (IoT), sensing systems, and intelligent decision-making applications. Through active participation, the faculty member enhanced his technical expertise and understanding of advanced technological trends, contributing to academic excellence, innovation-oriented teaching, and research-driven learning.

The Department of Mechanical Engineering, E.G.S. Pillay Engineering College (Autonomous), celebrated Pongal Festival 2026 on 20 January 2026 with great enthusiasm and cultural fervor. The event brought together students and faculty members to honor Tamil

heritage and traditional values through Pongal preparation, colorful kolam decorations, and festive activities. The celebration fostered unity, teamwork, and cultural awareness while providing participants with an opportunity to appreciate the significance of the harvest festival. The vibrant programme created a joyful atmosphere within the department, strengthened interpersonal bonds, and highlighted the institution’s commitment to preserving and promoting cultural traditions alongside academic excellence.

The Department of Mechanical Engineering proudly acknowledges the participation of Dr. S. Rajiv, Assistant Professor, in the six-day International Faculty Development Programme on “Sustainable Materials and Manufacturing: Paving the Way for a Circular Economy,” conducted in online

mode from 19 January 2026 to 24 January 2026. Organized by the Department of Mechanical and Mechatronics Engineering, Kamaraj College of Engineering and Technology, Virudhunagar, the programme focused on sustainable materials, advanced manufacturing technologies, and circular economy principles. Through active participation, Dr. S. Rajiv gained valuable insights into emerging trends in sustainable engineering and research, further strengthening his academic expertise and contributing to innovation-driven teaching and research excellence within the department.

The Department of Mechanical Engineering proudly acknowledges the active participation of five second-year students in a technical workshop conducted at Kongu Engineering College, Erode, on 22 January 2026. The workshop provided valuable opportunities for students to gain practical exposure to modern

engineering concepts through expert lectures, hands-on demonstrations, and interactive technical sessions. Participants enhanced their understanding of industrial practices, mechanical applications, and real-time problem-solving approaches, thereby strengthening their technical competencies and professional skills. The programme served as an effective platform for bridging the gap between academic learning and industry expectations, preparing students for future challenges in the engineering profession.

The Department of Mechanical Engineering, E.G.S. Pillay Engineering College (Autonomous), organized a guest lecture on “Engineering Innovations Behind BS-VI Standards in the Automobile Industry” on 23 January 2026 for second-year Mechanical Engineering students. The session was delivered by Dr. S. Thiagarajan, Managing Director, GWT Education Pvt. Ltd., Trichy, who provided valuable insights into advanced automotive technologies, emission control systems, and

engineering innovations developed to meet BS-VI emission standards. The lecture enhanced students’ understanding of current trends in the automobile industry, environmental sustainability, and regulatory advancements in vehicle design. The programme served as an enriching learning experience, bridging academic knowledge with real-world industrial practices and fostering awareness of sustainable engineering solutions.

The Department of Mechanical Engineering, E.G.S. Pillay Engineering College (Autonomous), organized an Alumni Webinar on “Engineering Design & Additive Manufacturing” on 5 February 2026 for II and III Year Mechanical Engineering students. The session was delivered by Mr. Vinoth B, alumnus of the 2014 batch and Proprietor of Delta Shore Engineering, Thiruvannur, who shared valuable insights into modern engineering design practices and emerging trends in additive manufacturing technologies. Conducted in online mode, the webinar

provided students with industry-oriented knowledge and exposure to advanced manufacturing techniques, enhancing their understanding of contemporary engineering applications. The programme served as an effective platform for alumni-student interaction, inspiring participants to explore innovative technologies and career opportunities in the manufacturing sector.

The Department of Mechanical Engineering, E.G.S. Pillay Engineering College (Autonomous), organized a One-Day Workshop on “AutoML-Driven Data Analytics and Visualization for Mechanical Engineering” on 11 February 2026 for II and III Year Mechanical Engineering students. The session was delivered by Mr. Arunjit Chowdhury, CEO of Enterprise Building Training Solutions (EBTS), Mumbai, who provided valuable insights into the application of automated machine learning, data analytics, and visualization techniques in engineering problem-solving.

The workshop exposed students to modern data-driven approaches used in industry, enhancing their analytical skills and understanding of emerging digital technologies in mechanical engineering. The programme served as an excellent platform for bridging traditional engineering concepts with advanced data science applications, preparing students for evolving industry demands.

The Department of Mechanical Engineering, E.G.S. Pillay Engineering College (Autonomous), successfully organized a Hands-on Training Program on Virtual Lab on 11 and 12 February 2026 for II and III Year Mechanical Engineering students. The programme was conducted by Mr. Saneesh P. F. and Ms. Shanamol C. J. from Amrita

Vishwa Vidyapeetham, who provided practical training on virtual experiments, simulation tools, and digital learning platforms. Through interactive sessions and hands-on activities, students gained valuable exposure to technology-enabled learning methods and simulation-based engineering practices. The workshop enhanced their understanding of virtual laboratory applications, strengthened practical knowledge, and promoted innovative approaches to engineering education, preparing students for modern digital learning environments.

The Department of Mechanical Engineering proudly acknowledges the participation of II Year Mechanical Engineering students in a technical workshop conducted at SRM University, Chennai, on 13 February 2026. The workshop provided valuable exposure to advanced engineering

concepts, emerging technologies, and practical industrial applications through expert lectures and interactive sessions. Students enhanced their technical knowledge, analytical thinking, and problem-solving abilities while gaining insights into current industry practices. The programme served as an excellent platform for experiential learning, helping bridge the gap between academic studies and real-world engineering challenges, and strengthening students' professional competence and confidence.

The Department of Mechanical Engineering, E.G.S. Pillay Engineering College (Autonomous), proudly celebrates the placement success of its students in LS Automotive during the 2025–2026 academic year. Students Sivagurunathan K., Gopi Nath M., Vasanth A., Muthukumar S., Harish Narayanan S., Asvath V., Shahabudeen R., and Nithish Kumar R. secured employment opportunities with salary packages ranging from ₹2.30 lakh to ₹2.54 lakh per annum. This remarkable achievement reflects the students' hard work, technical proficiency,

and career readiness, while highlighting the institution's commitment to quality education, skill development, and placement excellence. The department extends its heartfelt congratulations to the placed students and wishes them continued success in their professional careers.

The Department of Mechanical Engineering successfully organized an Alumni Interaction Programme for II Year Mechanical Engineering students on 16 February 2026. The session featured Mr. Abdulpharat, who shared his

professional journey, industry experiences, and valuable insights into career development. Emphasizing the importance of technical expertise, communication skills, and continuous learning, he guided students on preparing for industry expectations and emerging career opportunities. The interactive session enabled participants to clarify their doubts regarding professional growth and employment prospects, making it a highly informative and motivating experience. The programme served as an effective platform for strengthening alumni-student engagement and inspiring students to pursue their career goals with confidence and determination.

The Department of Mechanical Engineering organized a Career Guidance Session under Talent Talks 2025–26 on “Career Opportunities in Renewable Energy and Sustainable Technologies” on 20 February 2026 for IV Year Mechanical Engineering students. The session was delivered by Mr. Kalimuthu Nagarathinam, Founder and CTO of Reyna Group

of Companies, who shared valuable insights into the rapidly growing renewable energy sector, sustainable technologies, and emerging career opportunities in green engineering. The programme enhanced students’ awareness of future industry trends, environmental sustainability, and professional pathways in clean energy technologies. The interactive session inspired participants to explore innovative solutions and build careers that contribute to sustainable development and energy transformation.

The Department of Mechanical Engineering organized a Placement Drive in collaboration with Reyna Buildmat – “KALI: The God Transition for Construction” on 20 February 2026 for III Year Mechanical Engineering students. The recruitment programme provided valuable career opportunities in the

construction and infrastructure sector, enabling students to showcase their technical knowledge, problem-solving abilities, and communication skills through multiple evaluation rounds. Company representatives shared insights into modern construction practices, technological innovations, and industry expectations, offering participants a deeper understanding of real-world recruitment processes and professional requirements. The placement drive served as an excellent platform for career development, enhancing students’ industry exposure and readiness for future employment opportunities.

The Department of Mechanical Engineering proudly acknowledges the academic contribution of Dr. S. Rajiv, Assistant Professor, who delivered a seminar on “Qualitative & Quantitative Research Techniques in Business” on 5 March 2026 at St. Joseph’s College of Engineering and Technology, Thanjavur. The session highlighted the significance of research

methodologies, focusing on qualitative and quantitative approaches to data collection, analysis, and interpretation. Through discussions on modern research tools and practical applications, the seminar enriched the research capabilities of students and faculty members, fostering a systematic and analytical approach to academic and professional investigations. This achievement reflects the department’s commitment to knowledge sharing, research excellence, and interdisciplinary learning.

The Department of Mechanical Engineering proudly congratulates J. Monika Shree, a II Year student, for securing 4th Prize along with a cash award of ₹10,000 at the TNWISE 2026 TANCAMS Hackathon held at Periyar Maniammai Institute of Science and Technology, Thanjavur, on 7 March 2026. Her innovative project, titled “Self-Cleaning, Antimicrobial Superhydrophobic

Coating for Government Hospital Surfaces,” demonstrated exceptional creativity, technical expertise, and problem-solving skills in addressing real-world challenges. This remarkable achievement highlights the student’s commitment to innovation and research while bringing recognition to the institution’s efforts in fostering technological excellence and entrepreneurial thinking among students.

The Department of Mechanical Engineering, E.G.S. Pillay Engineering College (Autonomous), organized a Career Guidance Session under Talent Talks 2025–26 on “Career Opportunities in CNC Programming & Precision Manufacturing Industries” on 17 March 2026 for III Year Mechanical Engineering students. The session was delivered by Mr. V. Senthil Kumar, Founder of Sri Angalamman Precision Engineering CAD/CAM Centre, who shared valuable insights into CNC programming, precision manufacturing processes, and emerging career opportunities in the manufacturing sector.

The programme enhanced students’ understanding of advanced machining technologies, industry requirements, and professional skill development. Through expert guidance and interactive discussions, participants gained greater awareness of career pathways in modern manufacturing industries, motivating them to pursue specialized skills and industry-oriented learning.

The Department of Mechanical Engineering, E.G.S. Pillay Engineering College (Autonomous), in association with the ISTE Students Chapter, organized a webinar on “Integration of Renewable Energy Systems for Sustainable Industrial Manufacturing Applications” on 24 March 2026 for III Year Mechanical Engineering students. The session was delivered by Dr. S. P. Mangaiyarkarasi from University College of Engineering, Panruti, who shared valuable insights into the integration of renewable energy technologies in modern industrial manufacturing processes.

The webinar highlighted the importance of sustainable energy solutions, environmental responsibility, and energy-efficient industrial practices. Participants gained a deeper understanding of emerging trends in renewable energy and their applications in manufacturing, enhancing their awareness of sustainable engineering approaches and future career opportunities in the green energy sector.

AICTE RPS PROJECT
RESEARCH GRANT ACHIEVEMENT

E.G.S. Pillay Engineering College (Autonomous) is proud to announce the **AICTE RPS – Lab to Market (2025)** research grant achievement. This milestone reflects our commitment to innovation, research excellence, and societal impact.

Project Scheme	AICTE RPS – Lab to Market (2025)
Project Title	Development and Commercialization a Smart Anti-Vibration Boring Bar for High-Precision Deep Hole Machining
Co-Principal Investigator	Prof. Dr. S. Krishna Mohan
Funding Agency	AICTE
Budget Approved	₹34.96 Lakhs
Technology Readiness Level	TRL 6/7
Year	2026

Prof. Dr. S. Krishna Mohan
Co-Principal Investigator

The Department of Mechanical Engineering proudly celebrates a significant research achievement under the AICTE Research Promotion Scheme (RPS) – Lab to Market (2025). The project titled “Development and Commercialization of a Smart Anti-Vibration Boring Bar for High-Precision Deep Hole Machining” received a research grant of ₹34.96 lakhs from the All India Council for Technical Education (AICTE) in 2026.

Prof. Dr. S. Krishna Mohan served as the Co-Principal Investigator, contributing to the successful development of an innovative technology that achieved Technology Readiness Level (TRL) 6/7. This accomplishment highlights the institution’s commitment to research excellence, innovation, and industry-oriented technological development, while demonstrating strong potential for commercialization and real-world industrial applications.

E.G.S. PILLAY ENGINEERING COLLEGE
An Autonomous Institution (Affiliated to Anna University)
Accredited by NIEA & NAAC with Grade 'A++'

Excellence of Education

HYUNDAI *Congratulation*

TOP INSTITUTIONS IN CAUVERY DELTA ZONE
CELEBRATING INNOVATION

Happy to share that 2 students from III Year B.E - Mechanical Engineering students successfully completed Internship at Hyundai

The Department of Mechanical Engineering proudly recognizes the achievement of two III Year B.E. Mechanical Engineering students who successfully completed their internship at Hyundai during March 2026. The internship provided valuable industry exposure and hands-on experience in automotive engineering practices, enabling students to strengthen their technical competencies and gain practical insights into real-world industrial operations. This accomplishment reflects the students’

dedication, learning ability, and professional commitment while highlighting the department’s focus on industry-oriented education and experiential learning. Their success serves as an inspiration to fellow students to actively pursue internship opportunities and enhance their career readiness in the competitive engineering sector.

The Department of Mechanical Engineering proudly applauds the achievement of nine III Year B.E. Mechanical Engineering students who successfully completed an internship at Neyveli Lignite Corporation (NLC India Limited) from 16 March to 28 March 2026. The internship offered valuable exposure to industrial operations, mechanical systems, and real-time engineering practices, enabling students to bridge the gap between classroom learning and industry requirements. Through hands-on training and practical engagement, participants enhanced their technical .

knowledge, professional competencies, and understanding of large-scale industrial environments. This accomplishment reflects the students' dedication to learning and reinforces the department's commitment to providing industry-oriented opportunities that foster academic excellence and career preparedness

The Department of Master of Business Administration organized a Curriculum Guidance Session by Industry Expert on 6 January 2026, benefiting 42 faculty participants. The session was delivered by Mr. Ganesh Thirunavukkarasu, Founder and CEO of Uniqshift Ventures, Academic Mentor, and Talent Acquisition Leader. He shared valuable insights on curriculum design, industry expectations, essential laboratory

and practical skills, and effective strategies for enhancing student employability and campus placements. The interactive programme provided faculty members with a deeper understanding of current industry requirements, empowering them with greater clarity, confidence, and direction in curriculum development and academic planning. The session reinforced the institution's commitment to aligning academic practices with evolving industry needs and preparing students for successful professional careers.

The Department of Master of Business Administration organized a webinar on “Industry Expectations from MBA Graduates” on 7 January 2026 for 145 MBA students. The session was delivered by Mr. Madan Raju, Senior Manager, Namlatech India Pvt. Ltd., Puducherry, who shared valuable insights into emerging HR practices, employability skills, career readiness, and corporate behavioral competencies expected from management graduates. His practical guidance enhanced students’ understanding of industry requirements and professional development. Adding to

the department’s achievements, students E. Ebenezer and P. Jayahirithik secured placements at Ieyal (Own Chart) Pvt. Ltd., Chennai and Thiruvavarur respectively. Their success reflects the effectiveness of the department’s training initiatives and serves as an inspiration for fellow students aspiring to excel in their careers.

The Department of Management Studies marked a period of academic excellence and industry engagement through Alumni Conclave 2026 and notable faculty publication achievements. The Alumni Talk, delivered by Mr. N. Manikandan, Project Manager

at Nandhini Construction and an alumna of the 2017–2019 batch, provided MBA students with valuable insights into project management, leadership, teamwork, and industry expectations. The interaction strengthened students’ understanding of the practical application of management concepts in professional environments. Adding to the department’s accomplishments, faculty members Dr. B. Asha Daisy and Ms. A. Sowrnalakshmi published the books Foundations of Modern Financial Management and Innovations and Challenges in Human Resource Management respectively.

These scholarly contributions reflect the department’s commitment to academic excellence, research, and knowledge dissemination, while providing valuable resources for students, researchers, and management professionals.

The Department of Management Studies continues to celebrate student excellence through remarkable achievements in academics, competitions, and professional development. MBA students brought laurels to the institution by securing First Prize in the Product Launching Event at BIZFEST 2K26, a National Level Intercollegiate Meet held at Rabiammal Ahamed Maideen College for Women, Tiruvārur, on 29 January 2026.

They also actively participated in events such as the Business Quiz, Best Manager Award, and Photography competitions, demonstrating innovation, leadership, strategic thinking, and teamwork. Further enriching their learning experience, MBA students participated in a workshop on “Ensuring Women’s Rights to Safety and Mental Health” conducted at AVC College, Mayiladuthurai. Their enthusiastic involvement reflected the department’s commitment to holistic education, experiential learning, and the development of socially responsible future managers equipped with confidence, awareness, and professional competence.

A major highlight of the excursion was the visit to the world-famous Taj Mahal, one of the Seven Wonders of the World and a UNESCO World Heritage Site. Built by Mughal Emperor Shah Jahan in memory of his beloved wife Mumtaz Mahal, the monument stands as a timeless symbol of love, architectural brilliance, and artistic excellence. Students were captivated by the exquisite white marble structure, intricate

carvings, Persian-inspired architecture, and beautifully landscaped gardens. The visit enabled them to appreciate the historical significance of the monument and understand its contribution to India's global tourism industry and cultural identity.

The students also visited India Gate, one of the most iconic national monuments in the country. Built in memory of the soldiers who sacrificed their lives for the nation, India Gate symbolizes courage, patriotism, and national pride. Students learned about its historical significance and the role of memorials in preserving the nation’s heritage. The visit instilled a sense of respect for the country's history and inspired discussions on leadership, service, and national development.

Another memorable destination was the historic Red Fort, a UNESCO World Heritage Site and a remarkable example of Mughal architecture. Students explored the grand fort complex, including its majestic gateways, audience halls, and royal chambers. The visit provided valuable insights into India's political history, administrative systems, and cultural evolution during the Mughal era.

Observing the architectural grandeur and strategic planning of the fort helped students appreciate the importance of heritage conservation and historical management.

The Department of Management Studies, E.G.S. Pillay Engineering College (Autonomous), Nagapattinam, successfully organized a webinar on “The Art of Writing a Research Paper” on 20 March 2026 for 115 students. The session was designed to strengthen students’ research aptitude and academic writing skills by providing comprehensive guidance on the preparation and publication of quality research papers. The resource person shared valuable insights into the structure and format of

research articles, effective academic writing techniques, literature review methodologies, citation and referencing practices, and strategies for publishing in reputed journals. The webinar enhanced participants’ understanding of the research process and inspired them to engage in scholarly activities, contributing to the institution’s commitment to promoting research excellence and academic development among students.

The Department of Master of Business Administration organized a Career Guidance Program titled “Beyond MBA: Navigating the Landscape After the Degree” on 26 March 2026 for 145 students. The session was designed to equip management graduates with the knowledge and skills required to successfully transition from academia to the corporate world. Participants gained valuable insights into emerging career opportunities driven by digital transformation, including high-growth sectors such as FinTech, EdTech, Data Analytics, Business Intelligence, Sustainability, ESG practices, E-commerce, and Digital Supply Chain Management. The programme highlighted the evolving demands of the global job

market and emphasized the importance of aligning academic knowledge with industry expectations. The session enhanced students' awareness of future career pathways, industry trends, and professional competencies, empowering them to make informed career decisions and prepare confidently for dynamic business environments.

The Department of Management Studies, through its Marketing Club Vyapahara, successfully organized a sector-specific case discussion titled “Case Bytes on Indian FMCG Sector” for first-year MBA students. The session provided valuable insights into the dynamic and highly competitive Fast-Moving Consumer Goods (FMCG) industry, focusing on market trends, consumer behavior, branding strategies, and competitive positioning. Dr. S. N. Kanagarathinam, Assistant Professor, MBA, served as the resource person and delivered an engaging session emphasizing analytical thinking, problem-solving, and strategic decision-making in marketing. Through interactive case analyses and discussions, students gained practical exposure to real-world business challenges and innovative industry practices.

Guided by Dr. S. Chandrasekar, Professor and Head of the Department, and coordinated by Ms. R. Sangeetha, Assistant Professor, the event enhanced students' industry awareness and strengthened their understanding of contemporary marketing concepts and business strategies.

The Department of Master of Computer Applications successfully organized a Six-Day Virtual Faculty Development Programme on “AI-Driven Data Visualization and Predictive Analytics: Bridging Research and Industry Readiness” from 5 January 2026 to 10 January 2026. The programme benefited 32 participants, including faculty members, research scholars, and postgraduate students from engineering and arts & science disciplines. Eminent resource persons delivered expert sessions on AI-driven data analytics, machine learning, deep learning, AutoML, Explainable AI (XAI), data preprocessing, feature engineering, predictive modeling, and visualization tools such as

Python, Power BI, and Tableau. Through a combination of theoretical learning, practical demonstrations, and real-world case studies, participants gained valuable insights into modern AI technologies, ethical considerations, governance frameworks, and industry best practices. The programme successfully enhanced research capabilities, technical competencies, and industry readiness, reinforcing the department's commitment to promoting innovation, research excellence, and professional development.

The Department of Master of Computer Applications, in association with the Indian Society for Technical Education (ISTE), successfully organized a three-day hands-on workshop on “DevOps: CI/CD, Docker, Kubernetes & Cloud Deployment” from 5 February 2026 to 7 February 2026 for 57 II MCA students. The workshop was conducted by Mr. Sudhish Sudhakaran, CEO of Synvolve Intellis Private Limited, Coimbatore, who provided valuable industry insights and practical training on modern DevOps tools and workflows. The programme aimed to strengthen students’ technical competencies by offering hands-on exposure to continuous integration and deployment (CI/CD) pipelines, containerization using Docker, orchestration with Kubernetes, and cloud deployment strategies.

Through practical sessions and real-time demonstrations, participants gained industry-relevant skills, enhancing their understanding of software development operations and current IT industry practices. The workshop significantly contributed to bridging the gap between academic learning and professional requirements in modern software engineering environments.

The Department of Master of Computer Applications successfully organized Alumni Conclave 2026 titled “Kickstart Your Cloud Journey with AWS” on 13 February 2026 (FN) from 10.00 AM to 01.00 PM for 22 alumni participants. The session was delivered by Mr. S. Gunasekaran, Senior Software Engineer at Doodleblue Innovations Pvt. Ltd., Chennai, who shared

his professional experiences and valuable insights into the growing importance of Cloud Computing technologies, particularly Amazon Web Services (AWS), in the IT industry. He highlighted essential technical skills, AWS certification pathways, emerging career opportunities, and the significance of continuous learning and professional ethics for achieving success in the competitive technology sector. The interactive session provided participants with practical exposure to current industry expectations and evolving technological trends, while also enabling meaningful discussions on career planning, job roles, certifications, and workplace challenges. The programme strengthened the connection between alumni and the department while inspiring students to pursue cloud-based career pathways.

The Department of Master of Computer Applications successfully organized a five-day online coaching programme for TANCET'26 from 20 February 2026 to 24 February 2026 (07.00 PM to 08.00 PM) for 33 UG students from Arts and Science colleges. The coaching sessions were designed to enhance students' preparation for the TANCET examination by strengthening their aptitude, analytical reasoning, and technical knowledge, while also creating awareness about higher education opportunities in the MCA domain. The programme covered key areas such as logical reasoning, analytical skills, computer awareness, placement preparation, and an overview of the MCA programme. Students were guided on effective problem-solving techniques, examination strategies, career opportunities, and

placement prospects in the IT industry. The initiative served as a valuable platform to improve students' confidence, competitive exam readiness, and understanding of academic and career pathways in the field of computer applications.

The Department of Master of Computer Applications organized a one-day industrial visit on "Cloud Infrastructure: Cloud Enabling Technology and Microservices DevOps" on 27 February 2026 for 47 IMCA students at Orionshift Private Limited, Thanjavur. The visit provided students with valuable exposure to modern cloud computing technologies and industry practices used in designing, deploying, and managing scalable cloud-based applications. Participants were introduced to key concepts such as cloud infrastructure, virtualization, containerization, and cloud-enabled technologies that support efficient application hosting and resource management.

The session also highlighted the significance of microservices architecture in developing modular and scalable applications, along with the role of DevOps in automating software development, testing, integration, deployment, and monitoring processes. Students gained practical insights into CI/CD pipelines, version control systems, container orchestration, and real-time cloud deployment strategies. The industrial visit effectively bridged the gap between academic learning and industry expectations, enhancing students' understanding of contemporary software engineering and cloud computing practices.

The Department of Master of Computer Applications organized a Partial Delivery Programme on “Cloud Infrastructure: Cloud Enabling Technology and Microservices DevOps” from 12 March 2026 to 13 March 2026 for 57 IMCA students. The programme was designed to

provide both fundamental and advanced knowledge of cloud infrastructure, cloud-enabling technologies, microservices architecture, and DevOps practices widely adopted in the IT industry. The sessions offered practical insights into modern cloud computing environments, deployment strategies, containerization, automation, and Continuous Integration and Continuous Delivery (CI/CD) processes. Students gained exposure to real-time industry practices and understood the critical role of cloud technologies in software development and enterprise-level applications. The programme proved to be highly informative and significantly enhanced the technical skills, practical understanding, and industry readiness of the participants.

The Department of Master of Computer Applications successfully organized a Professional Development Programme on “Software Testing using Recent Tools and CI/CD Practices” on 16 March 2026 for 52 IMCA students in association with the International Association of Engineers.

The programme was designed to provide practical exposure to modern software testing methodologies, automation tools, and Continuous Integration/Continuous Deployment (CI/CD) practices widely used in the software industry. The session offered valuable insights into various software testing techniques, recent testing tools, bug tracking processes, and the importance of DevOps practices in modern application development. Students gained knowledge about automated testing frameworks, continuous integration pipelines, and deployment strategies that enhance software quality and development efficiency. The programme effectively strengthened participants’ technical skills and industry readiness by bridging the gap between academic learning and real-world software engineering practices.

The Department of Master of Computer Applications, in collaboration with IQAC and the R&D Cell, successfully organized a seminar on “Beyond Publications: Exploring Career Pathways through Patents and Intellectual Property Rights (IPR)” on 23 March 2026 for faculty members from various departments. The session was delivered by Dr. P. Arunkumar, Founder, Director, and Chief Mentor of Vidhyaboon Academy, Karaikal,

Puducherry, who provided valuable insights into the significance of intellectual property in research and innovation. Key topics discussed included the fundamentals of IPR, patentability criteria, patent drafting, patent filing procedures, the distinction between publications and patents, and emerging career opportunities in the IPR domain. With active participation from 30 faculty members, the seminar enhanced awareness of research commercialization, innovation protection, and intellectual property management, contributing to the institution’s efforts to foster a strong research and innovation culture.

The Department of Master of Computer Applications successfully organized a Career Guidance Programme on “Resume Building with AI” on 25 March 2026 for 32 IMCA students. The programme aimed to help students understand the importance of creating professional and impactful resumes using Artificial Intelligence tools and modern digital platforms.

The session provided valuable insights into effective resume writing techniques, AI-powered resume enhancement tools, keyword optimization, and industry expectations during recruitment processes. Students learned how to develop ATS-friendly resumes, improve content presentation, and effectively showcase their technical and professional competencies. The programme also highlighted the growing role of AI in career preparation and employability, enabling participants to build competitive resumes that enhance their placement prospects and career opportunities in the evolving job market.

The Department of Master of Computer Applications successfully organized an Entrepreneurship Development Programme on “Skill Enhancement, Business Awareness & MSME Empowerment” for 40 IMCA students on 27 March 2026. The session, delivered by Mr. R. Santhosh from Bazz Dynamics Private Ltd., provided valuable insights into entrepreneurship,

freelancing, and the MSME ecosystem. Students gained practical knowledge on entrepreneurial thinking, innovation, business model development, freelancing opportunities, portfolio creation, client proposal writing, and project management. The programme also introduced concepts such as idea validation, value proposition design, and business planning, enabling participants to understand how innovative ideas can be transformed into scalable ventures. The event significantly enhanced students’ entrepreneurial mindset, business awareness, and readiness for future career and startup opportunities.
