1904IT851	PROJECT WORK	L	T	P	C
		0	0	14	7
Course Objectives: The student should be made to: 1.To develop knowledge to formulate a real world problem and project's goals. 2.To identify the various tasks of the project to determine standard procedures. 3.To identify and learn new tools, algorithms and techniques. 4.To understand the various procedures for validation of the product and analysis the cost effectiveness. 5.To understand the guideline to Prepare report for oral demonstrations.					
Course Outcomes (COs) At the end of this course, students will able to, CO1: Formulate a real world problem, identify the requirement and develop the design solutions. CO2: Express the technical ideas, strategies and methodologies. CO3: Utilize the new tools, algorithms, techniques that contribute to obtain the solution of the project. CO4: Test and validate through conformance of the developed prototype and analysis the cost effectiveness. CO5: Prepare report and present the oral demonstrations.					
The students in a group of 3 to 4 works on a topic approved by the head of the department under the guidance of a faculty member and prepares a comprehensive project report after completing the work to the satisfaction of the supervisor. The progress of the project is evaluated based on a minimum of three reviews. The review committee may be constituted by the Head of the Department. A project report is required at the end of the semester. The project work is evaluated based on oral presentation and the project report jointly by external and internal examiners constituted by the Head of the Department.					
TOTAL: 140 Hours
